Office Action Summary	Application No. 09/694,653	Applicant(s) OVERMAN ET AL.	
	Examiner Charles A. Fox	Art Unit 3652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Handwritten mark

In view of the appeals brief filed on March 14, 2005, PROSECUTION IS HEREBY REOPENED. A new restriction requirement is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31. A new notice of appeal fee and appeal brief fee will not be required for applicant to appeal from the new Office action. Any appeal brief filed on or after September 13, 2004 must comply with 37 CFR 41.37.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a flats mail system and methods of using, classified in class 414, subclass 789.9.
- II. Claims 15-50, drawn to a mail piece handling apparatus and methods of using, classified in class 414, subclass 794.4

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any means may be used to

Art Unit: 3652

convey the objects to the device of invention I. The subcombination has separate utility such as sorting the order of the objects in a desired sequence as claimed in claim 15.

If invention I is elected a further restriction is required as presented below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I(a). Claims 1-7, drawn to a flats mail system, classified in class 414, subclass 789.9.

I(b). Claims 8-14, drawn to a method of handling flat mail, classified in class 414, subclass 802.

Inventions I(b) and I(a) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case it is well known in the art of mail handling to place mail into trays by hand.

If invention II is elected a further restriction is required as presented below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

II(a). Claims 15-39, drawn to a flats mail system, classified in class 414, subclass 794.4.

II(b). Claims 40-50, drawn to a method of handling flat mail, classified in class 414, subclass 814.

Inventions II(b) and II(a) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can

Art Unit: 3652

be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case sorting and placing mail into a tray is well known in the mail handling art.

A telephone call was made to David Tenant on June 9, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Fox whose telephone number is 571-272-6923. The examiner can normally be reached between 7:00-4:00 Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen D. Lillis can be reached at 571-272-6607. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
